TECHNICAL SKILLS

Frontend

React 19 · Next.js 15 · TypeScript · JavaScript · Tailwind CSS · Webpack · Zustand · TanStack Query · Formik · PrimeReact · Leaflet

Backend

NestJS · Node.js · PHP 8.3 · FastAPI · TypeORM · Express · REST APIs · BullMQ · SSE Streaming · Puppeteer

Data & Search

MySQL · Redis · Typesense · Python · CatBoost · pandas · DuckDB · Data Ingestion

AI & Integrations

LangChain · LangGraph · OpenAI · Google Gemini · MCP · Zoho CRM · Twilio · SendGrid

DevOps & Cloud

CI/CD · GitHub Actions · Docker · AWS Lambda · AWS S3 · Serverless · Vercel · Hetzner · Cloudflare · Nginx

LANGUAGES

English — Fluent

Passionate Full Stack Developer with nearly 4 years at HomeAbroad Inc. and Ziffy.ai, building production fintech and real-estate platforms at scale. Skilled across React, Next.js, TypeScript, NestJS, Node.js, PHP, and Python — from AI-native property search and SSE streaming to webhook backends, data pipelines, CatBoost rent models, and AWS deployments. Committed to delivering innovative, user-focused solutions through effective collaboration and continuous learning.

EXPERIENCE

Full Stack Engineer

Ziffy.ai · Full-time

Jan 2025 – Present
1 yr 9 mos · Remote

AI-native real estate investment platform — ziffy.ai

- Architected and shipped the **Next.js 15 / React 19** frontend for Ziffy.ai with dual-brand support (Ziffy + HomeAbroad), deployed on **Vercel** with ISR, BunnyCDN sitemaps, and brand-specific analytics.
- Built **AI-powered property search** with Server-Sent Events (SSE) streaming, real-time filter sync via Zustand, and integration with NestJS backend using OpenAI/Perplexity and Typesense full-text search.
- Delivered SEO-first programmatic listing pages (city/state/zip catch-all routes), property detail SSR, investment calculators (DSCR, cash flow), and mortgage pre-approval portal with document upload workflows.
- Integrated multi-channel analytics (GA4, Google Ads, Facebook Pixel, LogRocket, Vercel Analytics) and Fingerprint.js fraud detection on lead capture forms.
- Established dev tooling with Husky, lint-staged, Prettier, and TanStack Query; migrated legacy webpack multi-app frontend to modern App Router architecture.

Fintech/real-estate platform — software design and full-stack application development

- Built and maintained the core **NestJS REST API** (appi) — auth (JWT, OAuth, magic links), property search, loan estimates, pre-approval, CRM sync, document management, and AI features via LangChain/LangGraph/MCP with TypeORM/MySQL, Redis throttling, and BullMQ email queues.
- Developed the **React multi-app frontend** (ha-realtor-plat) with Webpack/Tailwind — agent dashboard, investor portal, property maps (Leaflet), loan calculators, term sheets, and document portal with role-based routing for RE agents, MLOs, and clients.
- Owned the **PHP 8.3 integration backend** (3rdpartycomms) — 60+ webhook receivers, 40+ cron jobs, and 12+ internal agent tools (ClearPath AI, Match AI, Power Dialer, comms centers) integrating Twilio, Zoho CRM, SendGrid, Retell AI, Floify, and Google Gemini.
- Authored reusable **TypeScript loan estimate library** (estimate-calculator) — fees, DSCR, liquidity, Excel rate-sheet parsing; consumed across API and frontend.
- Shipped **AWS Lambda headless browser service** (mortgage-pricer) — Puppeteer scrapers for 11 Non-QM/DSCR lender pricing portals with S3 audit screenshots and API Gateway deployment.
- Built **property data pipelines** and a **CatBoost rental AVM** (FastAPI/DuckDB) — Python scrapers (Zillow, Roofstock, Homes.com, HouseCanary) + Node.js ingestion to MySQL/Typesense with SSH tunnel staging workflows.
- Led **AWS Lightsail → Hetzner infrastructure migration** with xtrabackup streaming, automated bash tooling, and zero-downtime DNS cutover procedures.
- Implemented **GitHub Actions CI/CD** pipelines — build, SFTP upload, SSH deploy to production with staging/main workflows and rollback support.
- Maintained WordPress marketing site with custom Tailwind theme, Gutenberg blocks, SEO/lead capture integrated with Zoho CRM and webhook backend.

KEY PROJECTS

Ziffy.ai Platform
`Next.js 15 · React 19 · Zustand · TanStack Query · Vercel`
AI-native investor platform with streaming NLP search, SEO listings, DSCR calculators, and dual-brand deployment.

ha-realtor-plat
`React · Webpack · Tailwind · Leaflet · Zustand`
Multi-app agent/MLO platform — dashboards, property maps, loan workflows, and role-based routing for RE agents, MLOs, and clients.

appi — Core API
`NestJS · TypeORM · Redis · Typesense · LangGraph`
Modular REST API powering property search, loan estimates, auth, CRM sync, LangChain/LangGraph AI, and MCP tooling.

3rdpartycomms
`PHP 8.3 · MySQL · Redis · Cloudflare Zero Trust`
Webhook-driven integration hub with agent AI tools, nurture campaigns, and multi-channel comms orchestration.

mortgage-pricer
`TypeScript · Puppeteer · Express · AWS Lambda`
Headless browser microservice scraping live rates from 11 lender portals with pluggable scraper registry.

estimate-calculator
`TypeScript · Jest · Zero-dep library`
Reusable mortgage calculation engine — fees, liquidity, DSCR, points/pricing scenarios, Excel rate sheets.

data-pipelines
`Python · Node.js · Typesense · MySQL`
End-to-end property data acquisition — multi-source scrapers with chunked/resumable ingestion to MySQL.

Rental-Estimate-AVM
`Python · FastAPI · CatBoost · DuckDB · S3`
Rent estimates from real asking prices and comps — CatBoost training with SHAP explanations served over FastAPI.

EDUCATION

Post Graduate Diploma in Computer Application (PGDCA) — 2020 – 2021
Survey Institute Gulf Training
Jamshedpur

Honors / Regents High School Diploma — 2016 – 2019
HDVSc Degree College, Panaspada, Puri
Utkal University
